FUTURA RS 4 FUTURA RS 4 mineral

TECHNICAL DESCRIPTION

FUTURA RS 4 and **FUTURA RS 4 MINERAL** are plastomeric waterproofing membranes with outstanding performance, made of a latest generation distilled bitumen-based compound modified with POLYPROPYLENE (APP) and POLYOLEFIN (APAO) and continuous thread non-woven polyester fabric with elevated basic weight reinforced and stabilized by longitudinal glass fibre. The special type of compound and the elevated mechanical characteristics of the fabric (excellent elongation, remarkable tensile strength) suit these membranes to the heaviest use. The compound's special formula grants unique flexibility also at low temperatures (cold flexibility at -25 °C).

The innovative technology with which these membranes are made offers an additional guarantee of the product's quality, stability, and durability.

DESTINATION

| PRODUCT | SINGLE LAYER | | MULTI-LAYER | | | | ROOT BARRIER | VAPOUR BARRIER | FOUNDATIONS | | UNDER ROOFING TILES |
|--------------|--------------|--------|-------------|--------|------|--------|--------------|----------------|-------------|----|---------------------|
| | E. | U.H.P. | F.L. | | U.L. | | | | R.D. | P. | |
| | | | E. | U.H.P. | E. | U.H.P. | | | | | |
| 4 mm | • | • | • | • | • | • | | | | | |
| 4 mm Mineral | • | | • | | | | | | | | |

F.L.: Finishing Layer - U.L.: Underlying Layer - R.D.: Rising Damp - P.: Pitch - E.: Exposed - U.H.P.: Under Heavy Protection

FUTURA RS 4 and **FUTURA RS 4 MINERAL** are particularly indicated for use on the surfaces subjected to the heaviest stress because their plasticity ensures perfect support surface adhesion. Their excellent mechanical and dimensional stability characteristics indicate use in civil and industrial waterproofing with all structures (traditional, metal, prefabricated) in which these qualities are required. Waterproofing systems under heavy protection can be laid in single layers (whenever permitted by product) or multiple layers with minimum thicknesses of 7 mm (4+3 mm).

APPLICATION: INSTRUCTIONS AND RECOMMENDATIONS

FUTURA RS 4 can be provided with its upperside covered with a talc, sand, or a non woven polypropylene fabric. Its underside is protected and faced with **POLYFLAM EasyTorch** (reduced printed area increases product adhesion), the special non-stick polyethylene film to be flamed during laying. In the MINERAL version, the upperside is protected by an even layer of colored or natural mineral slate chips and features **BYSTOP** (patented) lateral and endlap sealing strip for easy overlapping.

Support surfaces must be dry, clean, and sufficiently smooth and level. Application is made by light flaming with propane gas. Laying is quick and easy.

STOCKING

Keep the products packed in the carton box in a dry place, away from direct sunlight. Do not place the pallets, one on top of another and the rolls must always be stocked in a vertical position. The contact with solvents and organic liquids may damage the product. Avoid application if the temperature is excessively low or high, avoid stamping (shoes with crampons, small objects or sharp edges). For further information contact Polyglass SpA Technical Office.

Keep out of direct sunlight.

Avoid stocking pallets without evenly distributing the load.

Keep the rolls standing.

Absolutely avoid puncturing the product.

APPLICATION METHOD

- ① Treat the area to be waterproofed with bituminous primer (POLYPRIMER HP 45 Professional).
- ② Position the "Bordangolo" near the horizontal-vertical joint.
- ③ Completely strip away the product identification tape.
- ④ In the colder months, we recommend heating up the roll of membrane before applying it.
- ⑤ Position and apply the sheet by flaming its bottom surface.
- ⑥ Pull the sheet up to a certain height against vertical surfaces.
- ⑦ Apply the second sheet with adequate overlapping.
- ⑧ Lay the second layer by overlapping. Do not cross the sheets.
- ⑨ Roll the overlapping areas using the special pressing roller.
- ⑩ Example of internal corner.
- ⑪ Example of external corner.
- ⑫ Example of vent pipe.

POLYGLASS SPA reserves the right to make any and all modifications required for the ongoing perfection of the product without notice.
